PERSONAL PROJECTS

Mar 2024 — Apr 2024

Vehicle Parking Management System

Developed a comprehensive parking management website using Django, CSS, HTML, Bootstrap, and JavaScript; integrated functionalities like vehicle registration and booking systems to streamline user experience for over 1,000 visitors monthly.

Mar 2024 — Mar 2024

Hospital Management System

Built a fully functional website utilizing Django, CSS, HTML, Bootstrap, and JavaScript, integrating a range of features to enhance user experience and streamline complex day to day tasks.

Feb 2024 — Feb 2024

Blog Web App

- Engineered a dynamic website using Django, CSS, HTML, Bootstrap, and JavaScript, allowing users to create and manage their own blogs while exploring content from own blogs while exploring content from other bloggers.
- The platform also features API integration, enabling seamless interaction with other software systems.

Oct 2022 — Dec 2024

Medical Database

- Leveraging Tkinter for the GUI, MySQL for database management, and various Python modules for added functionalities, I designed a comprehensive medical store application.
- The system enables users to efficiently add medicines, manage stock levels, and generate sales receipts, offering a seamless user experience.
- Additionally, the system features a user login module to enable multi-user access, ensuring secure and efficient management by multiple users.
